

Practical-4/5

Problem Statement: Your Communications instructor has asked each student in the class to create a two-page Web site to help students in the class get to know more about the area in which you are majoring in school. The first Web page is a home page that includes basic information about your major. If you can, add an image related to your chosen field somewhere on the Web page. Add a link to the second Web page. The second Web page includes a paragraph of text and numbered lists with links.

1st page Code:

```
<html>
<h1> I AM MAJORING IN COMPUTER SCIENCE AND ENGINEERING </h1>

<h2> what is computer science and engineering? </h2>

<p> Computer Science and Engineering is a branch of engineering which deals with the technical
and softwares of the computers,in CSE we learn how to code and develop apps softwares,how to
debug problems and solve errors in a system. you can become a full stack developer aur graphic
designer you can create apps and websites according to your own needs.You are the god of what
you had created.You can do whatever you want with your codes.

<h3> why one should choose computer science and engineering? </h3>
<body>

</body>
<p> Computer Science and Engineering is one of the most dynamic and versatile engineering
branches because technology has become an essential part of almost every industry. From banking
and healthcare to education, entertainment, automobiles, and space research, computers and
software are playing an increasingly important role. Choosing CSE gives students the opportunity to
understand how modern technology works and how it can be used to solve real-world problems
</p>

<p> it provides high career oportunities in every field as technology is used everywhere! </p>
<h4> Some imp points: </h4>

<ul> Wide career opportunities </ul>
```

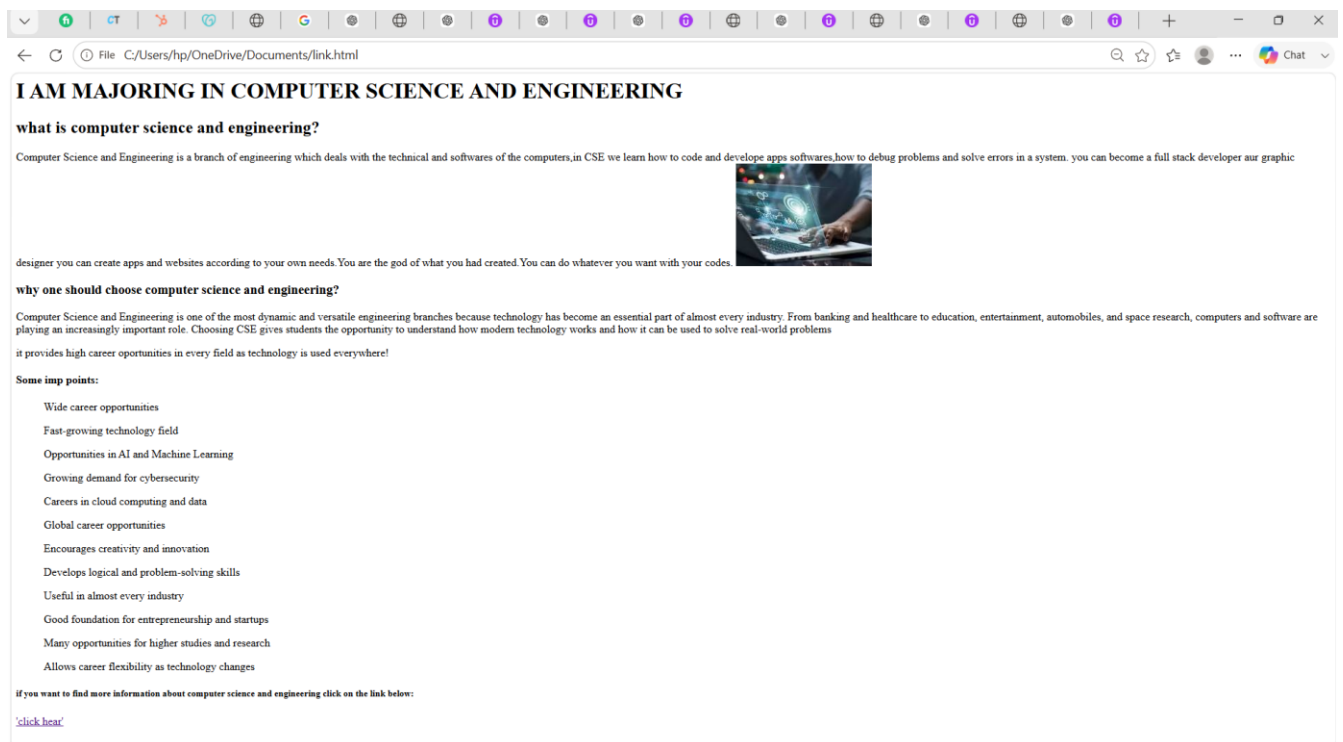

- Fast-growing technology field
- Opportunities in AI and Machine Learning
- Growing demand for cybersecurity
- Careers in cloud computing and data
- Global career opportunities
- Encourages creativity and innovation
- Develops logical and problem-solving skills
- Useful in almost every industry
- Good foundation for entrepreneurship and startups
- Many opportunities for higher studies and research
- Allows career flexibility as technology changes

2nd Page Code :

```
<html>
```

```
<body>
```

```
<h1>MORE IMP INFORMATION ABOUT COMPUTER SCIENCE AND ENGINEERING !</h1>
```

```
<h2>where it takes us?</h2>
```

```
<p>
```

One of the biggest advantages of CSE is the wide range of career opportunities it provides. A CSE graduate can work as a software developer, web developer, data analyst, cybersecurity professional, cloud engineer, AI/ML engineer, database administrator, or many other roles. This flexibility allows students to explore different areas and choose a career according to their interests and strengths.

```
<h2>Why did i choosed computer science and engineering?</h2>
```

```
<p>
```

I decided to choose computer science and engineering when i was in 10th class. I always like the things which mostly works as how i wanted it to work, and i started

getting interest in coding, developing, creating apps, games looking at the world and watching the importance of technology and growing internet. I also gained interest in computer science and i love to learn things about internet and computer. so its the reason why i choosed computer science and engineering!

```
</p>
